Dear Sir,

Since 2015 GDG Bangla working for Bangla Computing amelioration and GDG Bangla is the largest Bangla technological volunteer community platform in the globe. Google Developer Groups (GDGs) are for developers who are interested in Google's developer technology; everything from the Android, Chrome, Drive, and Google Cloud platforms, to product APIs like the Cast API, Maps API, and YouTube API. A GDG can take many forms — from just a few people getting together to watch our latest video, to large gatherings with demos and tech talks, to events like code sprints and hackathons. However, at the core, GDGs are focused on developers and technical content, and the core audience should be developers. All of initiatives what we take for community all are as volunteering manners.

In every year Google persuasive the DevFest (Developer Fest) and the GDG DevFests are large, community-run developer events happening around the globe focused on community building and learning about existent and ulterior technologies.

On the basis of that the Google Developers Group (GDG Bangla) and with the collaborating with Daffodil International Academy (DIA) also going to organize the DevFest'17 Bangla , which will more focusing Cloud Computing , GCP , AI , Machine Learning and Big data. The main purpose of DevFest'17 Bangla to perceive those the modern technology and how to exploit in our career as well as our real life effectuation. We are expecting 50 % of industries collaboration, 50 % for students as attendees.

We are expecting your kind presence in our event.

Thank You

Regards

Jabed Sultan Pias
Community Manager at Google Developers Group (GDG Bangla)

Md. Sarwar Hossain Mollah
Deputy Academic Director,DIA
